

Patient Journey Visibility

The Elements of Data Excellence

De-Identified

On-site and hosted tokenization of PHI and longitudinal patient matching

Integrated

Integration of specialty pharmacy and patient services data with syndicated assets

Stewarded

A continuous feedback cycle with network SPs to establish operational excellence

Cleansed

Data science and advanced data quality checks that correct for poor data quality and enable "actionable" patient journey analytics

Enriched

Data science-driven enrichment of patient journey statuses

Visualized

KPI scorecards and visualizations for patient initiation, adherence, patient engagement services and FRM case management

Mastered

Rigorous master data management to deliver key Payer-Channel insights and enable predictive analytics

How to build a forward-thinking specialty pharmacy data strategy
